

Installation Guide

Installation

First of all, **back up your store database and web directory**. It is wise to perform this procedure before any installation.

1. To install, please log in to your **Magento Admin Panel**.
2. Go to **System → Magento Connect → Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Under the **Direct package file upload** section select the **Choose File** button, browse for package file (.tgz) and click **Upload**.

4. Return to website back end.
5. Go to **System → Cache Management** and click **Flush Magento Cache** button.

6. Log out and then log in again to complete installation.
7. Congratulations! You are now ready to use **Color Swatch for Custom Options** extension.

Change Price If Mouse Over	Yes	[STORE VIEW]
Show hint for option types: Checkbox, Multiple Select	No	[STORE VIEW]

To enable Color Swatch on product list page you must added some code to template list.phtml. Follow these steps:

- Go to root directory of your site via ftp-manager.
- Find file by path - `\app\design\frontend\[your theme package name]\[your theme name]\template\catalog\product\list.phtml`.
- Open file via text editor.
- Search the following phrase in an open file:
 - For default theme - `<?php echo $this->getPriceHtml($_product, true) ?>`
 - For RWD theme - `<?php if(!$product->canConfigure() && $product->isSaleable()) ?>`.
- Results should return 2 matches (for list and grid mode).
- Paste the following code in the template according to your version of the theme:

```
<?php
if (Mage::helper('core')->isModuleEnabled('Ave_ColorSwatchCustom')) {
    Mage::helper('ave_colorswatchcustom')->layout($this, $_product);
}
?>
```

 - For default theme - paste the code after each line.
 - For RWD theme - paste the code before the first line. Search the following phrase in an open file - `<div class="actions">`. Insert the code before the line found

Style Settings

Appearance of the swatches can be set in this section

How add color swatch to custom options for product?

1. Open product to edit on admin end: **Catalog** → **Manage Products** → **Select needed product**.
2. Select tab **Custom options**. If list are empty please create new custom option.
3. Turn on option **Is Colorpicker** for needed custom options. Then choose color or image for each option.
4. Save product.

5. For example we provide screenshot **Custom Options** tab from our demo site for test product:

Updating extension

First of all, **back up your store database and web directory**. It is wise to perform this procedure before any uninstallation.

1. To update your extension to the latest version, please log in to your **Magento Admin Panel**.
2. Go to **System → Magento Connect → Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Locate the extension you are uninstalling in the **Magento Existing Extensions** section
4. Select **Uninstall** in the column **Actions**.
5. Click on **Commit Changes** and for the extension to be successfully removed.
6. Under the **Direct package file upload** section select the **Choose File** button, browse for package file (.tgz) and click **Upload**.

Direct package file upload

- 1 Download or build package file.
- 2 Upload package file: no file selected

7. Return to website back end.
8. Go to **System → Cache Management** and click **Flush Magento Cache** button.

9. Log out and then log in again to complete installation.
10. Congratulations! You have latest version **Color Swatch for Custom Options** extension.

Uninstalling extension

First of all, **back up your store database and web directory**. It is wise to perform this procedure before any uninstallation.

1. To uninstall, please log in to your **Magento Admin Panel**.
2. Go to **System → Magento Connect → Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Locate the extension you are uninstalling in the **Magento Existing Extensions** section
4. Select **Uninstall** in the column **Actions**.
5. Click on **Commit Changes** and for the extension to be successfully removed.
6. Return to website back end.
7. Go to **System → Cache Management** and click **Flush Magento Cache** button.
8. For remove data from database, execute these SQL-queries via phpMyAdmin (**please note: all your data entered for this extension will be lost**):

```
-- add table prefix if you have one
DELETE FROM core_resource WHERE code = 'ave_colorswatchcustom_setup';
#Note: next line remove configurations for Color Swatch for Configurable Products extension too
DELETE FROM core_config_data WHERE path like 'ave_color_swatch/%';
```
