

Installation Guide

Installation

First of all, **back up your store database and web directory**. It is wise to perform this procedure before any installation.

1. To install, please log in to your **Magento Admin Panel**.
2. Go to **System → Magento Connect → Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Under the **Direct package file upload** section select the **Choose File** button, browse for package file (.tgz) and click **Upload**.

4. Return to website back end.
5. Go to **System → Cache Management** and click **Flush Magento Cache** button.

6. Log out and then log in again to complete installation.
7. Congratulations! You are now ready to use **Size Chart** extension.

Updating extension

First of all, **back up your store database and web directory**. It is wise to perform this procedure before any uninstallation.

1. To update your extension to the latest version, please log in to your **Magento Admin Panel**.
2. Go to **System → Magento Connect → Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Locate the extension you are uninstalling in the **Magento Existing Extensions** section
4. Select **Uninstall** in the column **Actions**.
5. Click on **Commit Changes** and for the extension to be successfully removed.
6. Under the **Direct package file upload** section select the **Choose File** button, browse for package file (.tgz) and click **Upload**.

Direct package file upload

- 1 Download or build package file.
- 2 Upload package file: no file selected

7. Return to website back end.
8. Go to **System → Cache Management** and click **Flush Magento Cache** button.

9. Log out and then log in again to complete installation.
10. Congratulations! You have latest version **Size Chart** extension.

Uninstalling extension

First of all, **back up your store database and web directory**. It is wise to perform this procedure before any uninstallation.

1. To uninstall, please log in to your **Magento Admin Panel**.
2. Go to **System → Magento Connect → Magento Connect Manager** and log in to Magento Connect Manager with administrator credentials.
3. Locate the extension you are uninstalling in the **Magento Existing Extensions** section
4. Select **Uninstall** in the column **Actions**.
5. Click on **Commit Changes** and for the extension to be successfully removed.
6. Return to website back end.
7. Go to **System → Cache Management** and click **Flush Magento Cache** button.
8. For remove data from database, execute these SQL-queries via phpMyAdmin (**please note: all your data entered for this extension will be lost**):

```
-- add table prefix if you have one
